****PUBLIC NOTICE****

PUEBLO DE SAN ILDEFONSO

PUBLIC HEALTH EXECUTIVE ORDER TO END MARCH 31, 2023

Effective Friday, **March 31, 2023, at 11:59 p.m.**, Executive Order 2022-03, the "*Amended Order Regarding COVID-19 Restrictions and Requirements*" will be rescinded and no longer in effect. While this means that there will be no COVID-19 related restrictions within the Pueblo, we as a community must remain vigilant and careful about COVID-19, since it is still present in our Pueblo, and in the surrounding areas, with community infections rates continuing to fluctuate. As with any other communicable disease, the Coronavirus continues to be a risk to public health, if mitigation and prevention efforts are not practiced.

The Pueblo's Health and Human Services Department is working in collaboration with the Pueblo's Tribal Council on a long-range public health and emergency response plan and we will be providing more information on that in the near future. Although Executive Order 2022-03 is being rescinded at this time, we ask that you continue to take every day preventative measures, including continuing health hygiene practices, monitoring of you and your family for symptoms of COVID-19, getting tested if you suspect you or your family may have COVID-19, and follow public health guidance for infections, self-quarantine and isolation. Also be advised that a new Executive Order regarding COVID-19 restrictions may be issued should the conditions at the Pueblo change. So it is in all of our interests that we all continue to take actions to protect ourselves and our community from COVID-19. The Pueblo's Health and Human Services Department is available to provide assistance or guidance if you need it. Please contact (505) 252-5986.

After careful consideration and consultation, this decision has been determined to be appropriate. It is my hope that our community, sister Pueblos/Tribes and families will be minimally impacted as we move forward. It will be up to all of us to continue to work to keep our community strong and healthy. Look out for updated health notices and information.

Please contact the Governor's Office at (505) 455-2273 if you have any questions about this Notice.

FREE E-WASTE AND HOUSEHOLD GOODS

COLLECTION EVENT

APRIL 20, 2023

9:00 AM—3:00 PM

The Pueblo of Pojoaque Environment Department will be hosting a FREE E-Waste Collection Event in partnership with Goodwill Industries of New Mexico on April 20, 2023!

We want to open this event up to our neighboring tribes and the non-tribal community members as a method to reduce the amount of E-Waste material and useable household goods in our homes and landfills.

Why should we Recycle E-Waste

- Recycling recovers valuable materials from old electronics that can be used to make new products. As a result, we save energy, reduce pollution, reduce greenhouse gas emissions, and save resources by extracting fewer raw materials from the earth.
- Protects your surroundings. Safe recycling of old working or non-working electronics promotes sound management of toxic chemicals such as lead and mercury.
- Donating your used electronics benefits your community.
- E-Cycling creates job training and creates a market for the valuable components that are dismantled.
- Saves landfill space. E-waste is a growing waste stream. By recycling these items, landfill space is conserved.

You may bring your waste to the Transfer Station by April 17th or you can haul your own E-waste to site.

National Stress Awareness Month

Stress can be found when a person experiences fears, worry, or mental tension that could be brought on by challenges like job interviews, exams, workloads, career, conflict with family, friends, or colleagues. The natural human response helps us to deal with difficulties when the body feels threatened. First your heart beats faster, muscles tighten, blood pressure rises, and you breathe quicker, and your senses sharpen.

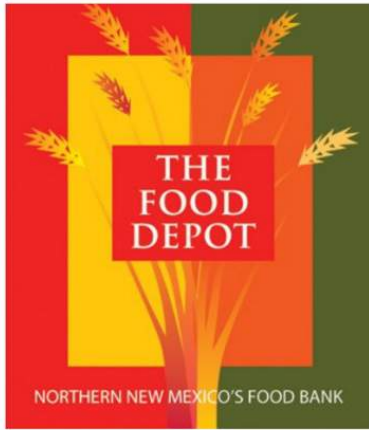

When we are stressed with an overload of emotions that cause us to feel anxious or irritable our ability to concentrate becomes difficult. We can experience having a headache, body pain, an upset stomach or trouble sleeping. For others, it may cause loss of appetite or an increase in appetite.

On the helpful side of understanding stress, it can reduce over time as situations improve or as a person learns to cope with the situation. Much of this stress response increases your strength and stamina, speeds up your reaction time, and improves your ability to focus.

Ways to manage stressful moments throughout the day:

- Find a physical activity that will help to boost your mood. *Take a walk (Or join HHS in the kitchen :)*
- Take time to think of your accomplishments – not what you didn't complete.
- Make daily, weekly, and monthly goals. Narrow down how you see these goals will help you to feel more in control of your tasks.
- Consider talking with someone, like a health professional, about your worries.

Project Updates

April 2023

Administrative Office – Portal

Improvements

The shade structure has been installed and improvements are now completed at the Tribal Administration building portal. There are picnic benches (one is ADA accessible). Community and staff are welcome to use the area.

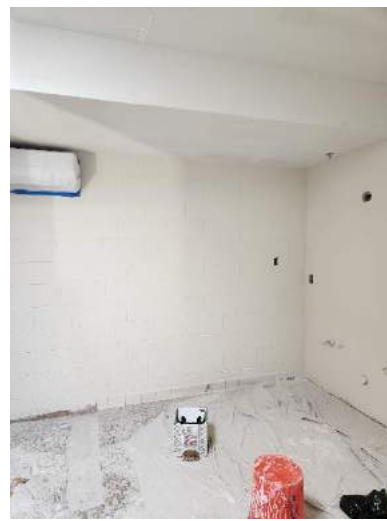

Tewa Center Renovations

The Tewa center is still scheduled for completion in June 2023. The crew is working on the bathroom remodel and framing/placing drywall over the interior ductwork.

Gymnasium Renovations

The portal area and shade structure are currently under construction (cement has been poured). TJC Construction and the crew have been busy with patchwork and painting. The gymnasium renovations are also scheduled for completion in June.

Tewa Tank Rehabilitation Project

The Tewa Tank rehabilitation project is nearly 50% complete. Additional necessary work was discovered during the project, which includes the replacement of the water intake valve. The tank remains empty and needs to dry prior to painting the interior. We anticipate project completion in the next month.

Community Wellness Center

In February 2023, the Request for Proposals was published for design/engineering services for the build-out/addition to the gymnasium.

Anchor Engineering, LLC has been awarded the contract. Initial design has been completed. We will keep the community posted as the project progresses

Povi Ka and Shumaa Po Projects

The Project Management and Transportation Department had a project kick-off meeting on March 24th. Striping is scheduled to be completed the week of April 3, 2023. Povi Ka will be completed prior to starting construction on Shumaa Po. Shuma Po will be closed during project construction (residents located on Shumaa Po will have access), which is scheduled to begin the week of April 10, lasting for three weeks. We will keep the community updated on all upcoming closures and detours.

Irrigation Projects

The Pueblo's "Water Team" is working with Sichler Construction to make necessary improvements to the Ortiz ditch so that the Pueblo can receive water in the near future. After these necessary repairs are made, a new irrigation pipe will be installed to better enhance water delivery for the Pueblo. The BIA has awarded San Ildefonso a grant to replace the west side irrigation pump to a 25 HP Pump, the project will begin this summer.

Lagoon Monitoring Project

The lagoon monitoring wells are currently being constructed/installed by EnviroDrill. The wells will provide information on current nitrates and underground flows so that the Pueblo can determine if the existing lagoons are compromised and need to be replaced. This is necessary for the Phase 3 Wastewater Treatment Facility project.

**If you have any questions on any of the projects in the Pueblo, please contact the Project Manager: Christy Ladd
