DECP News

Congratulations! Raymond Martinez

Director of the Department of Environmental and Cultural Preservation

*on receiving the
2024 Indigenous Resilience Leadership
Award
from the Indigenous Resilience Center
at the University of Arizona.*

This prestigious honorary award recognizes outstanding individuals making a positive impact in tribal communities to create healthy environments.

An award ceremony was held at the 2024 Southwest Adaptation Forum on Tuesday, February 27th, 2024.

The vision of Indigenous Resilience Center (IRes) is that we see a world in which Indigenous communities are thriving and adaptable to meet environmental and societal challenges. IRes is supported by the University of Arizona, the Agnese Nelms Haury Program in Environment and Social Justice and Arizona Institute for Resilience. IRes aims to position UArizona as a world leader in Indigenous resilience research, education, and outreach. In our work, we partner with Native Nations in community-driven projects to co-design tribal resilience solutions. We respectfully honor traditional knowledges and tribal sovereignty in our endeavors and support expanded pathways for students and scholars to pursue careers that are focused on building resilient communities and environments.

Excerpt University of Arizona Indigenous Resilience Center Facebook Page

The Agnese Nelms Haury Program Indigenous Resilience Leadership Award program was conceived in 2020 to elevate Native voices, to recognize people who advance Indigenous resilience, and to inspire others to follow in their paths. The Haury Program also recognizes those who have been mentors to the Program. These individuals help the Haury Program engage in philanthropy that is respectful, place-based, and impactful, recognizing the importance of reciprocity in all work for and with tribes.

Na'in bin ung sha

The mission of DECP is to preserve and protect the natural environment and the cultural resources of the Pueblo de San Ildefonso, to assess risks to human health and welfare, both quantitatively and qualitatively, and protect the health and welfare of the Tribal community.

Governor Moquino, Tribal Council and the Administration wish to congratulate Mr. Martinez for his hard work and dedication to his program, but also recognizing the need to continue to expand and implement new objects for continued environmental protections.

You have dedicated your time, not just for our community but for Tribal communities all over the country, to advocate for Tribal issues in Environmental field. We appreciate your continued dedication, commitment and passion to the environment and your community!

Congratulations, again, on earning such high honors, we know that you genuinely deserved this.

Hello my name is Sheldon Pena, So 'Ku'wah.

I stated working at the Transfer Station as a Station Assistant on February 22, 2024. With this position I have the opportunity, to help my community and neighbors by keeping them in a clean and safe environment.

I am a tribal member from here at the San Ildefonso Pueblo, I am part of the Pena, Tafoya, and Lovato family. On my free time I like to play video games, listen to music, work on my car and some of my families rides also.

I want to thank, my home and community of the San Ildefonso Pueblo for giving me the opportunity to help them in anyway I can, here at the Transfer Station or around the Pueblo. I'm excited to get to know my people, and for them to get to know me and where I come from.

Project Management Update

The Pueblo received a grant from Indian Health Services (IHS) to install water meters at each home and each Tribal building. This will help Pueblo Facilities staff diagnose leaks or other deficiencies in our water distribution system.

This activity will occur in two (2) Phases.

Phase 1 Water Meter Inventory:

The Pueblo will soon be hiring a contractor for Phase 1 Water Meter Inventory. The contractor will locate and map water service connections and service lines at every home throughout the Pueblo. The contractor will be accompanied by an escort from the Facilities Department who will attempt to coordinate with each homeowner prior to commencement of work.

Phase 2 Water Meter Installation:

The Pueblo will hire a contractor for Phase 2 Water Meter Installation. The contractor will install water meters following the initial inventory and mapping work completed in Phase 1. The contractor will be accompanied by an escort from the Facilities Department who will attempt to coordinate with each homeowner as the work approaches.

Therefore, a contractor and an escort from the Facilities Department will most likely be in your neighborhood or yard within the next 60 days to start Phase 1.

Thank you for your cooperation, as we move forward, to improve our water distribution system.
