10 HEALTHY HABITS FOR YOUR BRAIN

TAKE CHARGE OF YOUR BRAIN HEALTH. THESE HEALTHY HABITS CAN LOWER THE RISK OF DEVELOPING COGNITIVE DECLINE AND POSSIBLY DEMENTIA. THIS IS TRUE EVEN FOR PEOPLE WITH A HISTORY OF DEMENTIA IN THEIR FAMILIES.

Follow as many of these tips as possible to achieve the most benefits for your brain and body. It's never too late or too early. **Start now!**

Protect your head

Help prevent an injury to your head. Wear a helmet for activities like biking, and wear a seatbelt. Protect yourself while playing sports. Do what you can to prevent falls, especially for older adults.

Be smoke-free

Quitting smoking can lower the risk of cognitive decline back to levels similar to those who have not smoked. It's never too late to stop.

Get moving

Engage in regular exercise. This includes activities that raise your heart rate and increase blood flow to the brain and body. Find ways to build more movement into your day — walking, dancing, gardening — whatever works for you!

Challenge your mind

Be curious. Put your brain to work and do something that is new or hard for you. Learn a new skill. Try something artistic. Challenging your mind may have short- and long-term benefits for your brain.

Control your blood pressure

Medications can help lower high blood pressure. And healthy habits like eating right and physical activity can help too. Work with a health care provider to control your blood pressure.

Manage diabetes

Type 2 diabetes can be prevented or controlled by healthier eating, increasing physical activity and medication, if necessary.

Sleep well

Good quality sleep is important for brain health. Stay off screens before bed and make your sleep space as comfortable as possible. Do all you can to minimize disruptions. If you have any sleep-related problems, such as sleep apnea, talk to a health care provider.

Stay in school

Education reduces your risk of cognitive decline and dementia. Encourage youth to stay in school and pursue the highest level of training possible. Continue your own education by taking a class at a local library, college or online.

Eat right

Eating healthier foods can help reduce your risk of cognitive decline. This includes more vegetables and leaner meats/proteins, along with foods that are less processed and lower in fat. Choose healthier meals and snacks that you enjoy and are available to you.

Maintain a healthy weight

Talk to your health care provider about the weight that is healthy for you. Other healthy habits on this list — eating right, physical activity and sleep — can help with maintaining a healthy weight.

Senior Advocate

My name is Stuart Christian and I am the new Senior Advocate here at San I. My office is located at the back of the Senior Center Building and my office hours at the present time are from 8-5. My phone number is 505-455-4143 and my email is: senioradvocate@sanipueblo.org

One of my duties is to help seniors find resources, so I will be learning what resources are available for seniors and I will put those in future bulletins.

At present, for seniors (50+), the tribe has a reimbursement program for internet bills. Submit paid receipts to Rhonda Cata at the governor's office. Max per receipt is about \$49.

I tried lighting my furnace the other day and got down on the floor and it took me about 15 minutes to get back up (I've fallen and can't get up!). If you need help lighting your furnaces, call me and I will try to get someone at housing to come by and look at your situation and then they can determine if they can assist. Don't freeze!

Another of my duties is to advocate for you for such items as: understanding bills from phone or utility companies. Problems with Social Security, Medicare, Medicaid, insurance claims/bills and taxes.

And call me if you have problems with any agencies such as IHS, BIA, any other state or federal agency.

Need help deciding on which Medicare/Medicaid plan to sign up for? Or if approaching retirement, how to sign up for Medicare, or Medicaid? Call or come by and let's talk.

If you need help in reviewing your IRA or other retirement programs, or need to find out what funds you have to distribute per law, call or come by and we can discuss this.

Keeping this private is what I have to do, so your information or status will not be shared with anyone, not even my boss. This is a HIPA requirement for medical records and for financial items, just plain zipping my mouth. What happens in my office stays in my office!

At present I am not able to drive a tribal vehicle as I need to take a defensive driving course first, but we do have a senior driver just hired, so if you need to get somewhere (medical, or bill paying) let me know and I will try to get our senior driver to help you out.

A reminder that the senior center serves lunch from 11:30 to 12:30 M-F with breakfast served on the last Friday of the month (Oct 24 for October) starting at 10-11. No charge for seniors age 50+. If you are home bound, let me know and I can work with you to get the paper work done so that the senior center can deliver food to your home.

A reminder that if you have a smoke detector, you should replace your battery in the month of November. If you need help doing it, call me.

Tunyo Pin Activities for November:

Due to a lot of holiday activities, the seniors at the last Tunyo Pin meeting (held Oct 15) decided to only have a Cookie Fest on November 13. Bring freshly baked cookies (+12) for sharing with others and bring some more (6?) as the senior center driver will deliver some of the cookies to their regular home bound seniors the next day.

Next Tunyo Pin meeting will be Nov 19 at 10 am at the senior center.

Arts and craft session will be to make thanksgiving items. Nov 7, 1-3 at the senior center.

CRANKSGIVING IN SANTA FE!

On Saturday November 8th ride your bicycle in our 17th annual scavenger hunt. Cranksgiving is a food drive on two wheels. Bring a bike, a bag, a lock, and \$20-\$25 to buy food. Navigate city streets, urban trails and store aisles to find the specific ingredients for this year's holiday meal. All food collected will benefit The Food Depot of Northern New Mexico. Last time riders gathered over 6.2 tons of food in our bid to help stamp out hunger during the holidays. For more details, go to: www.cranksgivingsantafe.com

Kids love bikes

Daniel Schwab, the Pueblo's transportation planning manager, used to live in Europe. Here are some pictures he took while living there. They show how kids get around on bikes starting at a very young age. Biking is fun and good for you! Toddlers often accompany their parents to town by riding pedal-less bikes. And biking is often a social activity.

Most of the Pueblo, except for the State Highways, is safe for biking. Always remember to ride on the right side of the road, in the same direction as car traffic, and give yourself lots of space! The goal is to always be seen by drivers.

A childcare person had a bike with three baby-seats on the back!

PREVENTIVE TIPS FOR YOUR HOME DURING A SEASONAL CHANGE LIKE FALL AND WINTER:

As cold starts to settle in and it's time to turn off Air Conditioners (AC). It is important to unplug any window units and remove from window to close and seal window, if you choose not to remove window AC make sure, it is still unplugged and the area around the AC and window are sealed to prevent cold and air entering the unit. Swamp coolers need to have water supply shut off and removed from the home. Drain any water in the unit, unplug any electrical in the swamp cooler to prevent it being turned on. Install damper and cover unit with a tarp or cover and strap firmly to prevent cover coming off.

DAMPER

Make sure all outside water spigots or bibs are covered with Styrofoam covers and disconnect any hoses attached to the spigots during wintertime. This will prevent water from draining from hoses from freezing and entering the spigot causing bursting water lines within the walls.

Inspect all furnaces for dirt or lint. Vacuum or dust and remove filters to inspect for replacement. Filters in furnaces do have a directional arrow located on the side of the filter to show placement according to airflow. It is important that a filter is placed in the proper direction. Most modern furnaces do not have a pilot to turn on so when turning on thermostat furnace should ignite. If not a plumber or someone with knowledge with furnaces will have to be called. It is a smart idea to make sure vents are open and cleaned. In some circumstances duct cleaning might be needed.

Water heaters should be kept clean through vacuuming or simply wiping any accumulated dirt and dust. Do not store any items where Furnaces or water heaters are kept. This would prevent fires and allow those units to properly vent.

When fireplaces or wood stoves are used during wintertime, make sure they are properly cleaned of any ash, and any pipe vents are cleaned properly with a vent brush. Vents should be free of any accumulating ash or soot buildup; all these can prevent fires. Wood should be stored away from the house to prevent fires. Do not use gasoline or high combustibles to light a fire. Always have a fire extinguisher in an area that is accessible in case of fires and make sure that the extinguisher is full and in working order.
